- 2011- Guest Lecture, “Current concepts: Achilles tendon rupture”. Annual national meeting of Indian Orthopaedic Association, Jaipur

Editorial responsibility:

- Deputy Editor – Journal of Clinical Orthopaedics & Trauma
- Section Editor (Foot & Ankle) - Journal of Arthroscopy & Joint Surgery

Miscellaneous activities of value:

- **Policy & Impact:** I served as Clinical Director of Alliance Leicester, Leicestershire & Rutland from April 2020 to November 2023. During my tenure, I made a case for University of Leicester Medical students to attend the community hospitals so that they could be benefitted by this experience outside teaching hospital in the community as well it helped the university to offer more placements to the students. I planned and started the shock wave therapy service in the community. This has evolved very well and people Leicestershire who are troubled with musculoskeletal tendinopathy and fasciopathy are benefitted with this new service that I started.
- **Public Engagement:** I am planning to use the gait lab at University of Leicester for a new product testing (running shoe aimed at improving heel pain). I have designed this shoe & once prototypes are ready for testing, I will do the analysis with volunteers from DeMontfort University and University of Leicester. I will acknowledge my affiliations & support received from the Universities.
- **External Impact:** I am the Founder Director of British European Foot Ankle Academy (BEOFAA). This is an online Foot Ankle education Program that trains Orthopaedic Surgeons across the world. I started it in January 2024 & so far we have trained 132 surgeons from 30 different countries.
- **Citizenship & Partnerships:** I have started a new project with the School of Engineering, University of Leicester "Smart walking boot for improved treatment of Achilles Tendon Rupture" with 8 Year 4 students. The supervisors include Dr Jenny Shepherd and Manuela Trejo. Hopefully the new walking boot would be a better and cheaper product that could potentially help a lot of people worldwide who have injured their Achilles tendon.
